

UNILOCK 5-axis shoulder screws for fastening to workpieces, size 80 mm

Item description/product images

Description

Material:
Carbon steel.

Version:
Surface hardened and oxidised
Precision fits ground.

Note:
The UNILOCK 5-axis locating bolts for fastening to workpieces are suitable for clamping and positioning workpieces. These locating bolts are passed through the clamping bolts for fastening to workpieces, screwed directly into the workpiece and positioned on the basic module or add-on module. The thread is used for fastening and positioning the workpiece.
