

Linear ball bearing with internal race, steel, load capacity up to 3,959 kg

Item description/product images

Description

Material:

Rail and race ball-bearing steel.

Balls, ball-bearing steel.

Ball cage steel.

Version:

Rail, runner and ball cage electro zinc-plated.

Race inductively hardened.

Balls hardened.

Note for ordering:

Sold individually.

Note:

Linear ball bearing consisting of a guide rail and a race which runs within the ball cage in the guide rail. Mounting should be carried out horizontally if possible.

The internal stops limit the cage. Provide external stops for a loaded system.

Use grade 10.9 DIN EN ISO 10642 countersunk head screws to install the rail.

The maximum traversing speed is 0.8 m/s.

Application temperature -30 °C to +170 °C.

Linear ball bearing with internal race, steel, load capacity up to 3,959 kg
