

Guide rails central, plastic for roller tracks, steel

Item description/product images

Description

Material:

Plastic PVC.

ESD version plastic PVC, carbon fibre reinforced.

Version:

black or grey similar to RAL 7042.

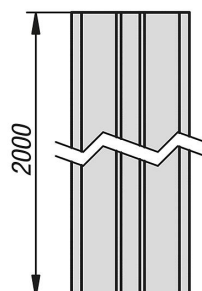

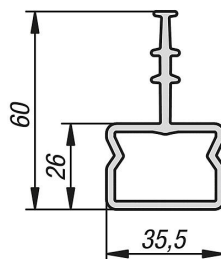

Note:

The guide rails hold the transport goods securely on the roller track. For installation, the guide rails are simply pushed into the suspension brackets or mounting brackets.

These guide rails are primarily used with parallel roller tracks to separate the roller tracks in the centre.

To protect sensitive products, the guide rails are also available in an electrostatically dissipative version (ESD).
