

## Port strips for UNILOCK clamping stations

### Item description/product images

### Description

#### Product description:

Port strip with rapid venting. The port strip can be mounted on UNILOCK clamping stations. The port strips raise the pneumatic ports away from the base. This means that they are not covered by piles of swarf.

Clean working on the clamping station is ensured by rapid venting to the rear via the port strip.

#### Material:

Aluminium.

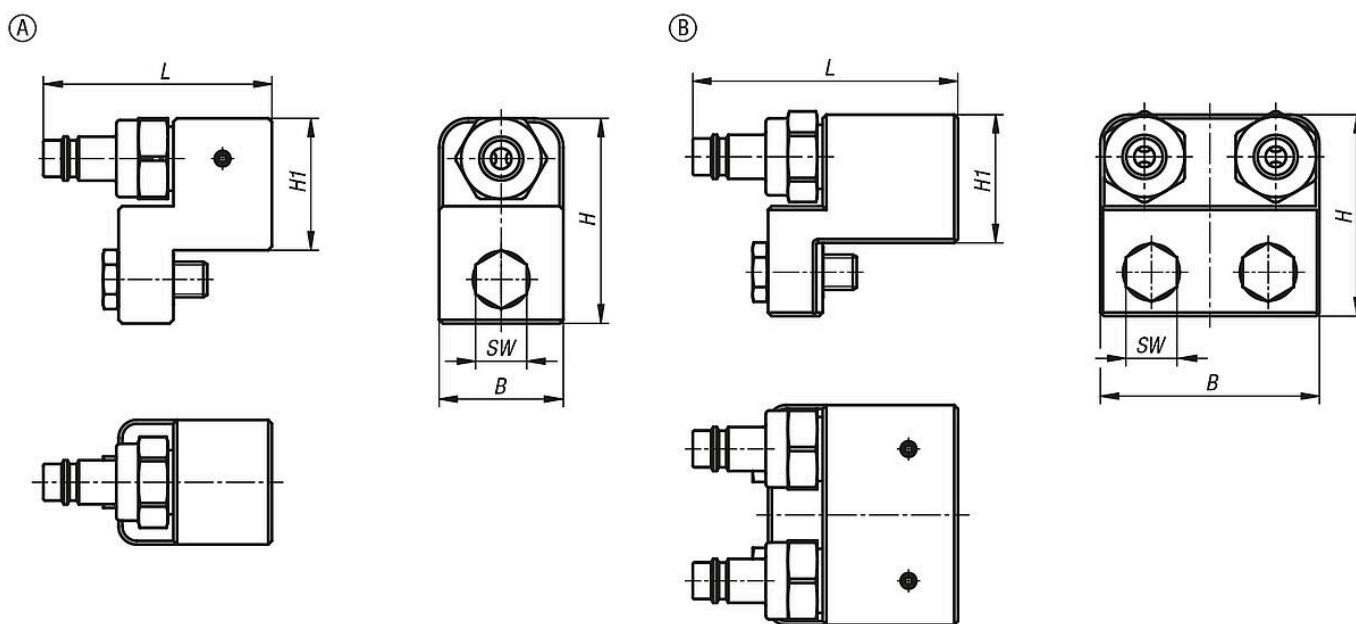

#### Version:

oxidised.

#### Advantages:

- Port strip with rapid venting.
- No swarf covering the pneumatic plug-in ports.
- Coolants are diverted to the rear by the rapid vent.
