

## Pneumatic installation tools for threaded inserts

### Item description/product images

### Description

**Material:**

Attachments tool steel.

**Note:**

This pneumatic installation tool is suitable for threaded inserts (standard K0398 and reinforced K0399).

Screwing-in and locking the splines is done at the touch of a button.

Operated by compressed air 5 - 7 bar. Compressed air port 1/4" NPT.

D1 is the internal thread of the thread inserts.

The installation tool and the attachment are ordered separately.

**Advantages:**

Quick installation of threaded inserts using a lightweight, ergonomic tool.
