

Turnbuckle nuts

steel tube, closed form DIN 1478

Material:

Steel.

Version:

Electro zinc-plated.

Sample order:

nIm 07221-06

Note:

These steel tube turnbuckle nuts are closed form and have a RH thread one end and LH thread other end.

The turnbuckle nuts conform with the German BRL (A) and bear the Ü symbol (ÜZ – Certificate of conformity from a recognised certification authority).

The core Ø of the female thread may be slightly larger than standard, this does not effect the function.

Order No.	C	D1	D2	D3	D4	H	M	Load capacity N
