

## Positioning stages long

with lateral electric drive

### Material:

Bearing block and carriage aluminium alloy.

Guide column and threaded spindle stainless steel.

Plain bearing for guide columns and spindle nut high-quality special plastic.

Toothed belts neoprene, profile 3M.

### Version:

Aluminium alloy anodised.

Stainless steel hardened and ground.

Threaded spindle with ball bearing.

### Sample order:

nIm 21083-0810

### Note for ordering:

The unit is supplied with the position of the drive unit, cable outlet or control unit as shown in the drawing. Other combinations can be selected online with our configurator.

### Note:

Positioning stages for motorised adjustment and positioning tasks. The plain bearings and spindle nuts are suitable for dry running, however lubrication with a grease for plastic plain bearings is recommended. The suitable programming software and interface cable for the stepper motor with positioning control are available as accessories (25000-15).

The stepper motor with a resolution of 200 increments per rotation allows a single direction calculated positioning accuracy of 0.005 mm. The absolute single direction positioning accuracy is 0.01 mm. The system can be operated with a duty cycle of 100%.

Can be combined with all other parts of the same size.

### Technical data:

Threaded spindle pitch: 2 mm

Axial backlash of threaded spindle: <0.04 mm

Radial play of guides: <0.02 mm

Max. input speed: 600 rpm

Max. travel speed: 20 mm/s

Max. duty cycle: 100 %

Application temperature: +10 °C to +50 °C

Order No.	Size	Form	Form-Type
21083-0810	8	A	without motor
21083-08111	8	B	with stepper motor
21083-08121	8	C	stepper motor with control
21083-1210	12	A	without motor
21083-12111	12	B	with stepper motor
21083-12121	12	C	stepper motor with control
