

# Safety Data Sheet according to Regulation (EC) No 1907/2006

Page 1 of 15

LOCTITE 243 known as Loctite 243 (Old)

SDS No. : 153494 V002.0 Revision: 19.10.2017 printing date: 09.02.2018 Replaces version from: 19.10.2017

### **SECTION 1: Identification of the substance/mixture and of the company/undertaking**

### 1.1. Product identifier

LOCTITE 243 known as Loctite 243 (Old)

#### **Contains:**

Maleic acid N,N'-Ethane-1,2-diylbis(12-hydroxyoctadecan-1-amide) Acetic acid, 2-phenylhydrazide

**1.2. Relevant identified uses of the substance or mixture and uses advised against** Intended use:

Adhesive

#### 1.3. Details of the supplier of the safety data sheet

Henkel AG & Co. KGaA Henkelstr. 67 40589 Düsseldorf

#### Germany

Phone: +49 (211) 797 0 Fax-no.: +49 (211) 798 4008

ua-productsafety.de@henkel.com

### 1.4. Emergency telephone number

The Henkel information service also provides an around-the-clock telephone service on phone no.+49-(0)211-797-3350 for exceptional cases.

### **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

### Classification (CLP):

Skin sensitizer

H317 May cause an allergic skin reaction.

### 2.2. Label elements

Label elements (CLP):

Hazard pictogram:

!

Category 1

| Hazard statement:                      | H317 May cause an allergic skin reaction.  |
|--|--|
| Precautionary statement:               | "***" ***For consumer use only: P101 If medical advice is needed, have product container or label at hand. P102 Keep out of reach of children. P501 Dispose of waste and residues in accordance with local authority requirements*** |
| Precautionary statement:<br>Prevention | P280 Wear protective gloves.   |
| Precautionary statement:<br>Response   | P333+P313 If skin irritation or rash occurs: Get medical advice/attention.   |

## 2.3. Other hazards

None if used properly. Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria.

## SECTION 3: Composition/information on ingredients

### 3.2. Mixtures

### General chemical description:

Product based on polyethylene glycol dimethacrylate.

### Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components<br>CAS-No.                                      | EC Number<br>REACH-Reg No.    | content                                     | Classification   |

For full text of the H - statements and other abbreviations see section 16 "Other information". Substances without classification may have community workplace exposure limits available.

## **SECTION 4: First aid measures**

4.1. Description of first aid measures

Inhalation: Move to fresh air. If symptoms persist, seek medical advice.

Skin contact: Rinse with running water and soap. Obtain medical attention if irritation persists.

Eve contact:

Rinse immediately with plenty of running water (for 10 minutes), seek medical attention from a specialist.

Ingestion: Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

4.2. Most important symptoms and effects, both acute and delayed SKIN: Rash, Urticaria.

Prolonged or repeated contact may cause eye irritation.

4.3. Indication of any immediate medical attention and special treatment needed See section: Description of first aid measures

### **SECTION 5: Firefighting measures**

5.1. Extinguishing media

Suitable extinguishing media: Carbon dioxide, foam, powder

Extinguishing media which must not be used for safety reasons: High pressure waterjet

#### 5.2. Special hazards arising from the substance or mixture

In the event of a fire, carbon monoxide (CO) and carbon dioxide (CO2) can be released.

#### 5.3. Advice for firefighters

Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.

### **Additional information:**

In case of fire, keep containers cool with water spray.

### **SECTION 6: Accidental release measures**

### 6.1. Personal precautions, protective equipment and emergency procedures

Avoid skin and eye contact. Ensure adequate ventilation.

### **6.2. Environmental precautions**

Do not let product enter drains.

#### 6.3. Methods and material for containment and cleaning up

For small spills wipe up with paper towel and place in container for disposal. For large spills absorb onto inert absorbent material and place in sealed container for disposal.

#### 6.4. Reference to other sections

See advice in section 8

### **SECTION 7: Handling and storage**

### 7.1. Precautions for safe handling

Use only in well-ventilated areas. Avoid skin and eye contact. Prolonged or repeated skin contact should be avoided to minimise any risk of sensitisation. See advice in section 8

### Hygiene measures:

Good industrial hygiene practices should be observed. Do not eat, drink or smoke while working. Wash hands before work breaks and after finishing work.

### 7.2. Conditions for safe storage, including any incompatibilities

Ensure good ventilation/extraction. Refer to Technical Data Sheet

Do not store together with food or other consumables (coffee, tea, tobacco, etc.).

## 7.3. Specific end use(s)

Adhesive

## **SECTION 8: Exposure controls/personal protection**

#### 8.1. Control parameters

### **Occupational Exposure Limits**

Valid for

Germany

| Ingredient [Regulated substance] | ррт | mg/m <sup>3</sup> |                    | Short term exposure limit<br>category / Remarks   | Regulatory list |

**Biological Exposure Indices:** 

None

#### 8.2. Exposure controls:

Engineering controls: Ensure good ventilation/extraction.

Respiratory protection:

Ensure adequate ventilation.

An approved mask or respirator fitted with an organic vapour cartridge should be worn if the product is used in a poorly ventilated area Filter type: A (EN 14387)

Hand protection:

Chemical-resistant protective gloves (EN 374).

Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):

nitrile rubber (NBR;  $\geq 0.4$  mm thickness)

This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection:

Safety glasses with sideshields or chemical safety goggles should be worn if there is a risk of splashing. Protective eye equipment should conform to EN166.

Skin protection:

Wear suitable protective clothing. Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

#### **SECTION 9: Physical and chemical properties**

9.1. Information on basic physical and chemical properties Appearance liquid Liquid blue Odor characteristic Odour threshold No data available / Not applicable 6.5 - 8.5 pH (25 °C (77 °F)) Melting point No data available / Not applicable Solidification temperature No data available / Not applicable >149 °C (> 300.2 °F) Initial boiling point > 93 °C (> 199.4 °F); Tagliabue closed cup Flash point Evaporation rate No data available / Not applicable Flammability No data available / Not applicable Explosive limits No data available / Not applicable Vapour pressure 0,133 mbar (27,0 °C (80.6 °F)) Vapour pressure < 300 mbar (50 °C (122 °F)) Relative vapour density: No data available / Not applicable 1,08 g/cm3 Density (20 °C (68 °F)) Bulk density No data available / Not applicable No data available / Not applicable Solubility Solubility (qualitative) Partially soluble (23 °C (73.4 °F); Solvent: Water) Partition coefficient: n-octanol/water No data available / Not applicable Auto-ignition temperature No data available / Not applicable Decomposition temperature No data available / Not applicable Viscosity No data available / Not applicable Viscosity (kinematic) No data available / Not applicable Explosive properties No data available / Not applicable Oxidising properties No data available / Not applicable

### 9.2. Other information

No data available / Not applicable

### **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

Reaction with strong acids. Reacts with strong oxidants.

10.2. Chemical stability

Stable under recommended storage conditions.

#### **10.3. Possibility of hazardous reactions** See section reactivity

**10.4.** Conditions to avoid

Stable under normal conditions of storage and use.

#### 10.5. Incompatible materials

See section reactivity.

### 10.6. Hazardous decomposition products

carbon oxides.

### **SECTION 11: Toxicological information**

#### 11.1. Information on toxicological effects

#### General toxicological information:

The mixture is classified based on the available hazard information for the ingredients as defined in the classification criteria for mixtures for each hazard class or differentiation in Annex I to Regulation (EC) No 1272/2008. Relevant available health/ecological information for the substances listed under Section 3 is provided in the following.

#### Oral toxicity:

May cause irritation to the digestive tract.

#### Inhalative toxicity:

May cause irritation to respiratory system.

#### Skin irritation:

This product is considered to have low dermal toxicity.

#### Eye irritation:

Prolonged or repeated contact may cause eye irritation.

#### Sensitizing:

May cause an allergic skin reaction.

#### Acute oral toxicity:

| Hazardous components | Value | Value         | Route of    | Exposure | Species | Method        |
|----------------------|-------|---------------|-------------|----------|---------|---------------|
| CAS-No.              | type  |               | application | time     |         |               |
| Cumene hydroperoxide | LD50  | 550 mg/kg     | oral        |          | rat     | not specified |
| 80-15-9              |       |               |             |          |         |               |
| Maleic acid          | LD50  | 708 mg/kg     | oral        |          | rat     | not specified |
| 110-16-7             |       |               |             |          |         |               |
| N,N'-Ethane-1,2-     | LD50  | > 2.000 mg/kg | oral        |          |         |               |
| diylbis(12-          |       |               |             |          |         |               |
| hydroxyoctadecan-1-  |       |               |             |          |         |               |
| amide)               |       |               |             |          |         |               |

|----------------------|-------|---------------|-------------|----------|---------|---------------|
| CAS-No.              | type  |               | application | time     |         |               |
| Cumene hydroperoxide | LD50  | 1.200 - 1.520 | dermal      |          |         | not specified |
| 80-15-9              |       | mg/kg         |             |          |         |               |
| Maleic acid          | LD50  | 1.560 mg/kg   | dermal      |          | rabbit  | not specified |
| 110-16-7             |       |               |             |          |         | _             |

## Skin corrosion/irritation:

| Hazardous components<br>CAS-No. | Result     | Exposure<br>time | Species | Method      |
|---------------------------------|------------|------------------|---------|-------------|
| Cumene hydroperoxide 80-15-9    | corrosive  |                  | rabbit  | Draize Test |
| Maleic acid<br>110-16-7         | irritating | 24 h             | human   | Patch Test  |

### Serious eye damage/irritation:

| Hazardous components<br>CAS-No. | Result            | Exposure<br>time | Species | Method   |
|---------------------------------|-------------------|------------------|---------|--|
| Maleic acid<br>110-16-7         | highly irritating |                  | rabbit  | OECD Guideline 405 (Acute<br>Eye Irritation / Corrosion) |

### Respiratory or skin sensitization:

| Hazardous components<br>CAS-No. | Result      | Test type                                       | Species    | Method  |
|---------------------------------|-------------|---|------------|---|
| Maleic acid<br>110-16-7         | sensitising | Mouse<br>local<br>lymphnod<br>e assay<br>(LLNA) | mouse      | OECD Guideline 429 (Skin<br>Sensitisation: Local Lymph<br>Node Assay) |
| Maleic acid<br>110-16-7         | sensitising | Mouse<br>local<br>lymphnod<br>e assay<br>(LLNA) | guinea pig | OECD Guideline 406 (Skin<br>Sensitisation)                            |

## Germ cell mutagenicity:

| Hazardous components<br>CAS-No. | Result   | Type of study /<br>Route of<br>administration          | Metabolic<br>activation /<br>Exposure time | Species | Method  |
|---------------------------------|----------|--|--|---------|---|
| Cumene hydroperoxide<br>80-15-9 | positive | bacterial reverse<br>mutation assay (e.g<br>Ames test) | without                                    |         | OECD Guideline 471<br>(Bacterial Reverse Mutation<br>Assay)           |
| Cumene hydroperoxide 80-15-9    | negative | dermal   |  | mouse   | not specified   |
| Maleic acid<br>110-16-7         | negative | bacterial reverse<br>mutation assay (e.g<br>Ames test) | no data                                    |         | Ames Test   |
|                                 | negative | mammalian cell<br>gene mutation assay                  | with and without                           |         | OECD Guideline 476 (In vitro<br>Mammalian Cell Gene<br>Mutation Test) |

### Carcinogenicity:

| Hazardous components<br>CAS-No. | Result           | Species | Sex         | Exposure<br>timeFrequenc<br>y of treatment | Route of application | Method  |
|---------------------------------|------------------|---------|-------------|--|----------------------|---|
| Maleic acid<br>110-16-7         | not carcinogenic | rat     | male/female | 2 y<br>daily                               | oral: feed           | OECD Guideline 451<br>(Carcinogenicity Studies) |

### **Reproductive toxicity:**

| Hazardous substances<br>CAS-No. | Result / Classification                     | Species                                    | Exposure<br>time | Species | Method   |
|---------------------------------|---|--|------------------|---------|--|
| Maleic acid<br>110-16-7         | NOAEL F1 = 150 mg/kg<br>NOAEL F2 = 55 mg/kg | Two<br>generation<br>study<br>oral: gavage | min. 80 d        | rat     | OECD Guideline 416 (Two-<br>Generation Reproduction<br>Toxicity Study) |

### **Repeated dose toxicity**

| Hazardous components<br>CAS-No. | Result               | Route of application   | Exposure time /<br>Frequency of<br>treatment | Species | Method   |
|---------------------------------|----------------------|------------------------|--|---------|--|
| Cumene hydroperoxide 80-15-9    |                      | inhalation:<br>aerosol | 6 h/d5 d/w                                   | rat     | not specified  |
| Maleic acid<br>110-16-7         | NOAEL=>= 40<br>mg/kg | oral: feed             | 90 ddaily                                    | rat     | OECD Guideline 408<br>(Repeated Dose 90-Day Oral<br>Toxicity in Rodents) |

## **SECTION 12: Ecological information**

### General ecological information:

The mixture is classified based on the available hazard information for the ingredients as defined in the classification criteria for mixtures for each hazard class or differentiation in Annex I to Regulation (EC) No 1272/2008. Relevant available health/ecological information for the substances listed under Section 3 is provided in the following.

### 12.1. Toxicity

#### **Ecotoxicity:**

Do not empty into drains / surface water / ground water.

| Hazardous components<br>CAS-No.                                      | Value<br>type | Value      | Acute<br>Toxicity | Exposure<br>time | Species                         | Method   |
|--|---------------|------------|-------------------|------------------|---------------------------------|--|

| 123-26-2                                     |  |

#### 12.6. Other adverse effects

No data available.

## **SECTION 13: Disposal considerations**

### 13.1. Waste treatment methods

Product disposal:

Dispose of in accordance with local and national regulations.

Contribution of this product to waste is very insignificant in comparison to article in which it is used

Disposal of uncleaned packages:

After use, tubes, cartons and bottles containing residual product should be disposed of as chemically contaminated waste in an authorised legal land fill site or incinerated.

Disposal must be made according to official regulations.

Waste code

08 04 09 waste adhesives and sealants containing organic solvents and other dangerous substances

The valid EWC waste code numbers are source-related. The manufacturer is therefore unable to specify EWC waste codes for the articles or products used in the various sectors. The EWC codes listed are intended as a recommendation for users. We will be happy to advise you.

## **SECTION 14: Transport information** 14.1. UN number Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. 14.2. UN proper shipping name Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. 14.3. Transport hazard class(es) Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. 14.4. Packing group Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. 14.5. **Environmental hazards** Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. 14.6. Special precautions for user Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. 14.7. Transport in bulk according to Annex II of Marpol and the IBC Code not applicable

### **SECTION 15: Regulatory information**

**15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture** VOC content < 3,00 % (2010/75/EC)

#### 15.2. Chemical safety assessment

A chemical safety assessment has not been carried out.

#### National regulations/information (Germany):

| WGK: | WGK = 1, slightly water endangering product. Classification according to the mixture rules in German VwVwS regulation annex 4 from 27.July 2005               |
|------|---|
| WGK: | WGK = 1, slightly water endangering mixture. Classification according to the mixture rules in German AwSV regulation annex 1, number 5.2 from 18. April 2017. |

Storage class according to TRGS 510: 10

### **SECTION 16: Other information**

The labelling of the product is indicated in Section 2. The full text

of all abbreviations indicated by codes in this safety data sheet are as follows:

H242 Heating may cause a fire.

H301 Toxic if swallowed.

H302 Harmful if swallowed.

H312 Harmful in contact with skin.

H314 Causes severe skin burns and eye damage.

H315 Causes skin irritation.

H317 May cause an allergic skin reaction. H319 Causes serious eye irritation.

H330 Fatal if inhaled.

H331 Toxic if inhaled.

H335 May cause respiratory irritation.

H351 Suspected of causing cancer.

H373 May cause damage to organs through prolonged or repeated exposure.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects.

H411 Toxic to aquatic life with long lasting effects.

H413 May cause long lasting harmful effects to aquatic life.

#### Further information:

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.
