

# DZUS® QUARTER-TURN FASTENERS

## DZUS® Quarter-Turn Fasteners

## DZUS® Quarter-Turn Fasteners

Southco offers an extensive selection of **DZUS®** Quarter-Turn Fasteners to satisfy a broad range of requirements for quick access, high strength, and economical performance. Each product line comes with its own set of matched receptacles for accurate, secure engagement and convenient mounting in a range of applications.

## The **DZUS®** advantage

- Low installation cost
- Fast, repeatable access
- Lower assembly cost
- Faster service calls
- Better ergonomics
- Improved aesthetics

82

85

D8

D1

D4

D5

## PANEX Quarter-Turn Design

- Bail and wing design
- Snap-on, ergonomic bail covers
- Available in bright, black and chrome finishes

.....and more is on the way.

For the latest updates and additions to all of Southco's quick access products go to [www.southco.com/dzus](http://www.southco.com/dzus)

### (DZUS® specification worksheet)

Use the following worksheet to specify the parts for your

**DZUS® quick access system (Example in blue)**

System type: **82 DZUS® Lion quarter-turn fastener**

#### 1. Select receptacle type: Clip-on: 82-47-113-15 page 383

**Notes:** Stud selection column letter shown will be used to determine stud length in step 4. Ensure the receptacle chosen will accommodate the frame thickness.

#### 2. Select retainer and accessories and note any adjustment values:

**Accessories:** Cupped washer, black 82-46-101-41 page 385

**Retainer:** Stainless Steel, 82-32-201-20

**Adjustment values:**

**When using a cupped washer, add 0.5 (.020) to outer panel thickness or total material thickness (TMT).**

#### 3. Specify stud length: To determine stud length, first determine the material thickness value, TMT.

**Notes:** Each receptacle has a unique formula to calculate the value of TMT. Use the formulas given with the receptacle you choose. Add accessory adjustment values to TMT as appropriate.

Select the configuration that best represents the application

Application configuration: **Type 2** (page 383)

Outer panel thickness: **2 (.078)**

Frame thickness: **2 (.078)**

Gap thickness: **0 (0)**

Accessory adjustment: **Add 0.5 (.020) to outer panel (P)**

**Configuration Type 2:**

Calculate TMT using the formulas given for the receptacle.

**Example:**

**TMT = P + F + 1.4 (.055) + 0.5 (.020) (for cupped washer thickness)**

**TMT = 2 (.078) + 2 (.078) + 1.4 (.055) + 0.5 (.020) = 5.9 (.232).**

#### 4. Finish the stud part number: (page 379)

Head style: **Wing head**

Material: **Steel, zinc plated**

**Final list of materials:**

- 82 -47-113-15** Receptacle: Steel clip-on
- 82 -32-201-20** Retainer: Stainless steel
- 82 -46-101-41** Accessory: Cupped washer, black
- 82 -12-240-16** Stud: Wing head, K=240, steel, zinc plated

**Notes:** Ensure final list of materials are from the same product class and size

#### Choose system (page 376)

#### 1. Select receptacle type

Clip-on receptacle 82-47-113-15

#### 2. Select accessories

Cup washer add 0.5 (.020) to the outer panel thickness (P) 82-46-101-41

#### 3. Calculate TMT

Type 1

$$TMT = P + F$$

Type 2

$$TMT = P + F + 1.4 (.055)$$

#### Configuration 2

Use the TMT value to find the correct stud length on the stud selector page.

The correct column of TMT ranges is given on the receptacle page.

TMT Range		K
Min.	Max.	
2.3 (.090)	2.8 (.110)	100
2.8 (.110)	3.3 (.130)	120
3.3 (.130)	3.8 (.150)	140
3.8 (.150)	4.3 (.170)	160
4.3 (.170)	4.8 (.190)	180
4.8 (.190)	5.3 (.210)	200
5.3 (.210)	5.8 (.230)	220
5.8 (.230)	6.3 (.250)	240

#### Stud: Part Number Selection

D7

NY

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from pages 380-384

#### 2. Select retainer and accessories

from page 385 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (left) using the column (A, B, C, or D) given for the receptacle selected, find **K**.

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**.

#### Example:

For rivet-on with base receptacle 82-35-302-15 use column D

For TMT value calculated as 5.2 (.206), K = 200

For slotted head style in steel material, completed part number: 82-11-200-16

A complete example can be found on page 377

#### Notes

Stainless steel material may require a higher minimum order quantity. Contact Southco for details.

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from page 388-390

#### 2. Select retainer and accessories

from page 391 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (left) using the column (A, B or C) given for the receptacle selected, find **K**

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

#### Example:

For rivet-on with base receptacle 85-35-295-15 use column C

For TMT value calculated as 5.2 (.206), K = 200

For slotted head style in steel material, completed part number: 85-11-200-16

A complete example can be found on page 377

#### Notes

Stainless steel material may require a higher minimum order quantity. Contact Southco for details.

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from pages 394-396

#### 2. Select retainer and accessories

from page 397 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the length selection table (left) using the column (A, B, C, D or E) given for the receptacle selected.

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

#### Example:

For rivet-on

D8-334-400-121 use column A  
For TMT value calculated as 5.2 (.206), K = 12

For slotted head style in steel, zinc plated material, completed part number: D8-314-112-190

A complete example can be found on page 377.

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from pages 400-402

#### 2. Select retainer and accessories

from page 403 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (left) using the column (A, B, C, D or E) given for the receptacle selected.

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

#### Example:

For rivet-on

D8-336-400-121 use column A

For TMT value calculated as 5.2 (.206), K = 12

For slotted head style in steel material, completed part number: D8-316-112-190

A complete example can be found on page 377.

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from pages 406-408

#### 2. Select retainer and accessories

from page 409 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (left) using the column (A, or B) given for the receptacle selected.

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

#### Example:

For rivet-on

D8-339-400-121 use column A

For TMT value calculated as 5.2 (.206), K = 13

For slotted head style in steel, zinc plated material, completed part number: D8-319-113-190

A complete example can be found on page 377.

#### Notes

Stainless steel material may require a higher minimum order quantity.

Contact Southco for details.

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from pages 411-413

#### 2. Select retainer and accessories

from page 413 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (right) using the column (A, B, C, or D) given for the receptacle selected.

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

Example: For rivet-on

D1-004-001-010 use column A  
For TMT value calculated as 5.2 (.206), K = 55

For slotted head style, completed part number: D1-004-055-030  
A complete example can be found on page 377.

### Notes

#### Adjustment value:

When using accessories the components increase TMT

Add the adjustment value to your outer panel thickness (P) when calculating TMT (see page 377 for example)

Type	K Range	Part Number	Material	Adjustment Value
Retainer split	All	D1-004-000-010	Acetal, black	Add 1.1 (.045)
Self-ejecting springs	045 to 070	D1-X1135-2S	Stainless steel	Add 2.3 (.090)
Self-ejecting springs	075 to 100	D1-X1137-2S	Stainless steel	
Self-ejecting cup	All	D1-X1129	Acetal, black

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from page 415

#### 2. Select retainer and accessories

from page 416 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (right) using the column (A or B) given for the receptacle selected.

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

Example: For rivet-on

D4-S3-175 use column A

For TMT value calculated as 5.2 (.206), K = 35

For slotted head style in steel material, completed part number: D4-AJ3-35

A complete example can be found on page 377.

#### Notes

Stainless steel material may require a higher minimum order quantity. Contact Southco for details.

### Retainers · Size 3, 4, 5 and 6

#### Material and Finish

Retaining ring: Steel, zinc plated

Retaining spring: Stainless steel

Retainer GH: Aluminum, natural

Retainer GP, natural: HD Polythene

Retainer GP, black: Polypropylene

#### Installation Notes

1. Place the retainer on the mandrel as shown
2. Align ring or spring ends so that they will miss the stud cam
3. Place mandrel in end of stud cam
4. Place tool over mandrel
5. Push retainer until it is sealed in stud undercut

#### Notes

Tooling:

29 - TFRS hand tool: Spreads the inside diameter of retainers over stud shanks and then pushes them into stud undercuts.

29 - TB1A block: Nests stud heads during installation. (Any flat block may be used for BJR bail head studs).

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from pages 420-421

#### 2. Select retainer and accessories

from pages 416-417 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (right) using the column (A, B, C, or D) given for the receptacle selected.

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

Example:

For rivet-on

D4-S4-225 use column A

For TMT value calculated as 5.2 (.206), K = 40

For slotted head style in steel material, completed part number: D4-AJ4-40

A complete example can be found on page 377

## To select correct fastener:

### 1. Select receptacle

Choose a receptacle from pages 424-425

### 2. Select retainer and accessories

from pages 416-417 and note any adjustment values

### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (right) using the column (A, B or C) given for the receptacle selected.

### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

Example:

For rivet-on

D4-S5-225 use column A

For TMT value calculated as 5.21 (.205), K = 40

For slotted head style in steel material, completed part number: D4-AJ5-40

A complete example can be found on page 377.

## Notes

Stainless steel material may require a higher minimum order quantity. Contact Southco for details.

### To select correct fastener:

#### 1. Select receptacle

Choose a receptacle from page 427

#### 2. Select retainer and accessories

from pages 416-417 and note any adjustment values

#### 3. Specify stud length

Calculate the total material thickness (TMT) using the formula given for the receptacle selected. Find the range of TMT using the stud length selection table (right) using the column (A or B) given for the receptacle selected.

#### 4. Complete the stud part number

by specifying the head style **H**, stud length **K**, and material **M**

Example:

For rivet-on

D4-S6-300 use column A

For TMT value calculated as 5.2 (.206), K = 45

For slotted head style in steel material, completed part number: D4-AJ6-45

A complete example can be found on page 377.

### Notes

Stainless steel material may require a higher minimum order quantity. Contact Southco for details.

# D4 DZUS® Standard Line Quarter-Turn Fasteners

## Receptacles · Size 6

427

### Rivet-On

Part Number		H	Stud Selection Column
Steel	Stainless Steel		
D4-S6-275	D4-S6-275SS	6.99 (.275)	A
D4-S6-300	D4-S6-300SS	7.62 (.300)	

### Material and Finish

Steel, zinc plated or stainless steel

### Notes

After selecting receptacle use stud selection letter **A** and follow instruction on page 426

### Part Number

See table

### Weld-On

Part Number	H	Stud Selection Column
D4-X441-310	7.87 (.310)	B
D4-X441-335	8.51 (.335)	

### Material and Finish

Steel, zinc plated

### Notes

After selecting receptacle use stud selection letter **B** and follow instruction on page 426

### Part Number

See table

## D5 DZUS® Panel Line Quarter-turn Fasteners Studs

DZUS® Panel line features captive, flare-in stud assemblies and continuous receptacle strip.

- Captive to outer panel
- Predictable clamping force
- High vibration resistance
- Visual latched indication

### Material and Finish

Steel, zinc plated

### Performance Details

Rated tensile and shear:  
890 N (200 lbs.) when used with  
DZUS® receptacles

### Stud assembly

### Panel Preparation

1. Select receptacle type
2. D5-PR35S3 (angle) or D5-PR35-IS3 (flat) receptacle types. Determine outer panel thickness and use column A. Select from column C for assemblies.

### OR

D5-PB35 (Single hole wire form) receptacle type. Determine outer panel thickness and use column A, then calculate total material thickness (TMT) required as indicated in column B. Select from column C for assemblies.

Other options available. For complete details on variety, part numbers, installation and specification, go to

[www.southco.com/D5](http://www.southco.com/D5)

Panel line stud assembly options

# D5 DZUS® Panel Line Quarter-turn Fasteners Receptacles

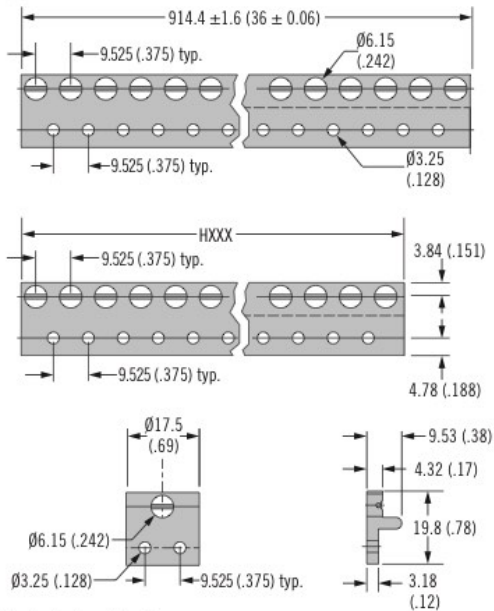

429

## Angle

## Flat

## Single hole wire form

Angle Receptacle		Stud selection column
Standard length D5-PR35S3		A
Custom length D5-PR35HXXX		
Single hole D5-PRB35		

Flat Receptacle		Stud selection column
Standard length D5-PR35-1S3		A
Custom length D5-PR35-1HXXX		
Single hole D5-PRC35		

Single hole wire form receptacle		Stud selection column
D5-PB35		B

## Material and Finish

Right angle, flat aluminum and stainless steel

Single hole wire form steel zinc plated

## Select Receptacle Profile

1. Right angle or flat
2. Single hole, standard length (96 holes) or custom length
3. If custom length HXXX (2 holes Min. - 319 holes Max.) determine number of useable receptacle holes.  
Total length = No of useable holes multiplied by 9.525 (.375) minus 1.525 (.06)

Example:

319 useable holes  
= 319 x 9.525 (.375)  
- 1.525 (.06) = 3037 (119.56)  
Replace HXXX with H319

\* Longer standard lengths available. Contact Southco for details.
