

LAMP SQUARE TURNTABLE (POSITIVE LOCK AT 90 DEGREES) HTS-165SP Supports Offset LoadsLatest
Info

Passed 100K Rotation Private Cycle Test

Passed 15K Offset Load Rotation Private Cycle Test

- Industrial rotating plate that withstands offset load.
- Rotates 360° and **locks every 90° (unlocked by lever operation)**.
- Friction function provides appropriate resistance to ensure smooth rotation.
- Centre hole for cable management.
- The M5 tapping on the lever tip allows a grip lever or wire to be fitted and operated.

Specifications

- Operating temperature: 0°C - 40°C
- Locking strength: 150 N·m
- Pass/fail criteria for rotation tests:
No abnormal noise or operational faults during rotation (except torque).

Applications

- For equipment direction change; also for inspection units and monitors

Remarks

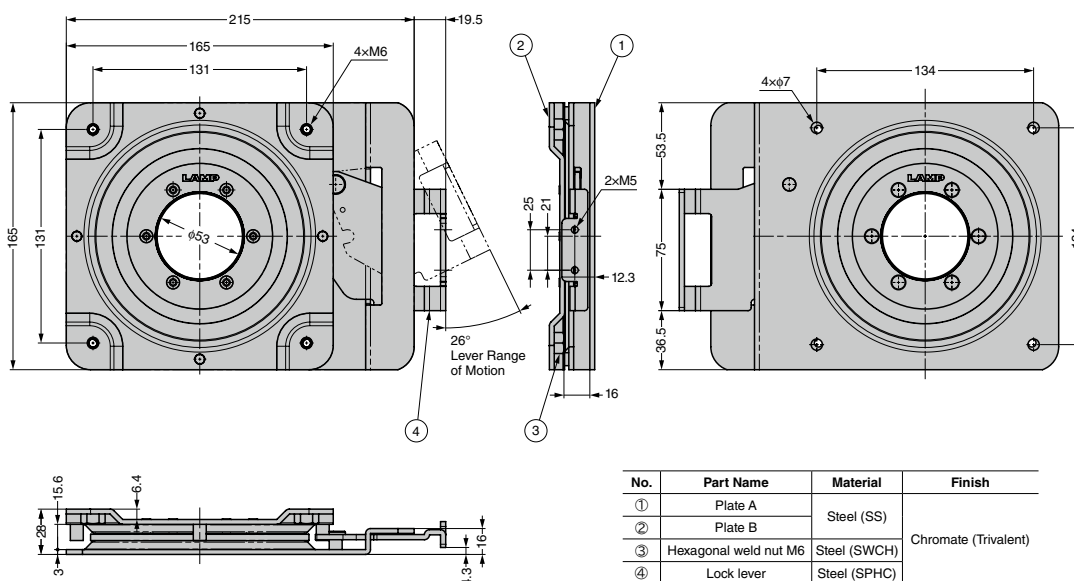

- Ensure that there is no contact between the mounting screws and the fixing nut.
- Avoid using this product for high-speed or continuous rotation.
- Store and use this product in horizontal conditions.

Unlocked

Spring-closed lock lever
