

Vacuum Tube Lifter JumboFlex Battery
Efficient Handling Solution for Starter Batteries

Vacuum Tube Lifter JumboFlex Battery

Complete Handling Solution for Starter Batteries

**Ergonomic and
Safe Handling of
Starter Batteries!**

Complete handling solution for starter batteries: Vacuum Tube Lifter JumboFlex Battery

Application

- Handling of starter batteries of different sizes and geometries
- Picking of starter batteries at the system supplier
- Sequence-accurate providing at the vehicle manufacturer
- Use by distributors in the spare parts business

Schmalz Handling Solution

- Vacuum Tube Lifter JumboFlex with ergonomic one-hand operation
- Special area gripper with sealing foam for starter batteries with different cover geometries
- Smooth running aluminum jib crane or overhead crane system
- Maximum lift capacity of the system 27 kg

Your Benefits

- Increased productivity by reducing handling times
- Ergonomic design with minimal physical strain on the operator
- No gripper changeover for different battery sizes and geometries
- Use even when mechanical solutions fail, e. g. small spaces between batteries or batteries without lifting handle
- Simplistic movement saves production time (e. g. Loss of many operations, such as setting up of handles, manual pre-positioning for mechanical recordings)

Ergonomic one-hand operation of JumboFlex Battery

Whether closely stacked or types of batteries. Both can easily be handled with only one Vacuum-Gripper from above
